

Training  
Course

**Monitor Well Productivity & Flow  
Line Safety**

**Skills** سكلز  
International الدولية  
for Training & Consulting للتدريب والاستشارات

## Course Plan

### Introduction

This course aims to equip participants with a thorough understanding of monitoring well productivity and maintaining the integrity of flow line pressure safety valves. By combining theoretical sessions, practical exercises, and case studies, participants will develop the skills needed to optimize well performance and improve safety measures in oil and gas operations.

### Course Objectives:

- ✓ Understand the fundamentals of well productivity monitoring.
- ✓ Gain insights into advanced well production analytics.
- ✓ Familiarize participants with different types of safety valves and their applications.
- ✓ Develop skills in safety valve installation, maintenance, and troubleshooting.
- ✓ Learn to integrate well monitoring and safety valve management for effective well control.

## Training Methods:

- ✓ Online Video material.
- ✓ Presentation.
- ✓ Live Interactive sessions.
- ✓ Course presenter will make extensive use of all tools that will be needed for the virtual environment.
- ✓ Questions & Answers

## Course Outline:

### Day One

#### **Fundamentals of Well Productivity Monitoring**

- Introduction to Well Productivity
- Significance of Effective Monitoring
- Types of Well Monitoring Systems
- Key Parameters for Well Performance
- Hands-on Exercise: Setting up Basic Monitoring Parameters

### Day Two

#### **Advanced Well Production Analytics**

- Real-time Data Acquisition Techniques
- Interpretation of Downhole Measurements
- Surface Pressure and Temperature Analysis

Skills International for Training and Consulting, Kuwait - Al-Nassar Tower, 21st Floor -  
Office 7 -Tel: (+965) 22250142 Email: [training@skillsinternationalkw.com](mailto:training@skillsinternationalkw.com) – Website:  
[www.skillsinternationalkw.com](http://www.skillsinternationalkw.com)

- Flow Rate Monitoring Strategies
- Case Studies on Successful Well Optimization

### Day Three

#### **Introduction to Flow Line Pressure Safety Valves**

- Overview of Flow Line Pressure Safety Valves
- Types of Valves and Their Applications
- Regulatory Standards and Compliance
- Importance of Safety Valve Integrity
- Practical Session: Safety Valve Components and Functions

### Day Four

#### **Safety Valve Installation and Maintenance**

- Proper Installation Procedures
- Routine Maintenance Protocols
- Troubleshooting Common Valve Issues
- Importance of Regular Testing and Inspections
- Simulation Exercise: Safety Valve Installation and Testing

### Day Five

#### **Integrated Well Management and Safety**

- Data Integration for Holistic Well Management
- Creating Effective Well Monitoring Plans
- Emergency Response Planning for Valve Failures
- Ensuring Regulatory Compliance

## Training Details

|                          |   |
|--------------------------|---|
| Course Duration          | 5 Days  |
| Pre-Schedule             | 4 – 8 Nov 2024  |
| Venue                    | Dubai – The H Hotel   |
| Training Fees Per Person | KWD 1250 ( One Thousand Two Hundred Fifty )   |
| Course Fees Include      | <ul style="list-style-type: none"><li>✓ Tuition documentation</li><li>✓ Curriculum and Training Handout</li><li>✓ Five Star Lunch</li><li>✓ Completion Certificates</li></ul> |
