**Operational Security
Management for Team Leaders**

Course Plan

Introduction

In today's rapidly changing threat landscape, security team leaders play a critical role in protecting people, assets, and operations. Effective operational security management requires not only technical expertise but also strong leadership, decision-making, and crisis-handling skills. This course equips team leaders with the knowledge, tools, and strategies needed to manage day-to-day security operations, coordinate their teams effectively, and respond decisively to incidents.

Course Objectives:

- ✓ Understand the core principles of operational security management.
- ✓ Lead and motivate security teams to ensure high performance.
- ✓ Conduct risk assessments and implement mitigation measures.
- ✓ Develop and enforce security policies and standard operating procedures (SOPs).
- ✓ Manage access control, surveillance, and emergency response systems.
- ✓ Respond effectively to incidents, crises, and security breaches.
- ✓ Strengthen communication and coordination between teams and stakeholders.
- ✓ Promote a proactive security culture within the organization.

Who Should Attend?

- Security Team Leaders & Supervisors
- Senior Security Officers
- Facility & Site Security Coordinators
- Risk & Compliance Supervisors
- Anyone preparing for a leadership role in security operations

Training Methods:

- ✓ Online Video material.
- ✓ Presentation.
- ✓ Live Interactive sessions.
- ✓ Course presenter will make extensive use of all tools that will be needed for the virtual environment.
- ✓ Questions & Answers
