

Training  
Course

**Advanced Fire Incident  
Command and Control for Fire  
Officers**

## Course Plan

### Introduction

The Advanced Fire Incident Command and Control for Fire Officers course is designed to equip experienced fire officers with the knowledge, skills, and strategic thinking required to manage complex fire incidents. This training emphasizes leadership, tactical decision-making, and resource management during emergencies, helping officers navigate high-pressure situations with confidence. With a focus on real-life scenarios and modern firefighting challenges, this course prepares participants to take command in a variety of critical incidents.

### Course Objectives:

- ✓ Enhance decision-making and leadership skills in high-stakes fire incident scenarios.
- ✓ Develop advanced tactical and operational strategies for managing large-scale fire incidents.
- ✓ Improve coordination and communication with emergency response teams, both internally and externally.
- ✓ Build proficiency in resource management during fire emergencies to optimize response times and outcomes.
- ✓ Prepare participants to handle specialized incidents, including hazardous materials and industrial fires.
- ✓ Integrate modern technologies and data analytics into fire incident management.

## Who Should Attend?

- ❖ Fire officers, Fire inspectors
- ❖ Safety engineers, Senior fire officer
- ❖ Crisis team
- ❖ Firefighting team leaders

## Training Methods:

- ✓ Online Video material.
- ✓ Presentation.
- ✓ Live Interactive sessions.
- ✓ Course presenter will make extensive use of all tools that will be needed for the virtual environment.
- ✓ Questions & Answers

## Course Outline:

### Day One

- Introduction to Advanced Fire Incident Command
- Leadership in High-Pressure Situations
- Fire safety management
- Understanding the Incident Command System (ICS)
- Role of a Fire Officer in Incident Management

## Day Two

- Tactical Decision-Making and Command Priorities
- Fire prevention & Mitigation
- Incident Size-Up and Risk Assessment
- Managing Resources During Fire Emergencies
- Communication Strategies in Crisis Situations

## Day Three

- Coordination with External Agencies and Mutual Aid
- Fire Behavior Analysis and Tactical Responses
- Separation zones – Compartmentation
- Incident Command Technologies and Data-Driven Decisions
- Command and Control of Large-Scale Fire Incidents

## Day Four

- Managing Multi-Agency Response Teams
- Firefighting – Building access and facilities
- Handling Industrial and Hazardous Material Fires
- Advanced Fireground Operations
- Incident Escalation: Contingency Planning and Execution

## Day Five

- Command Post Organization and Operational Control
- Post-Incident Evaluation and Debriefing Techniques
- Case Studies: Lessons Learned from Major Incidents
- Future Trends in Fire Incident Command and Control
- Typical contents of a Fire Emergency Action Plan

## Training Details

Course Duration	5 Days
Pre-Schedule	21 – 25 October 2024 / 25 – 29 November 2024
Venue	London – Double Tree by Hilton - Kinsington
Training Fees Per Person	KWD 1500 ( One Thousand Five Hundred Only )
Course Fees Include	<ul style="list-style-type: none"><li>✓ Tuition documentation</li><li>✓ Curriculum and Training Handout</li><li>✓ Five Star Lunch</li><li>✓ Completion Certificates</li></ul>
